

NORDIK

More than ten years ago we designed our first inflatable boat and launched production in Russia. From this moment the boats is our life. Our boats became an integral part of work and leisure for hundreds of thousands people. Thereafter we can proudly say that a dream for safe and comfortable use of inflatable boat became true in many territories due to our constant efforts to improve quality and design of our product.

Now PETROSET RECREATIONAL PRODUCTS GROUP is a leading supplier of inflatable boats in Russia. All our boats are designed by own R&D division, with high competence in seaworthy and durable use in variable climate conditions. We produce boats both in Russia and in China. All our production facilities have multi-stage quality control system, inclusive overall material check, production control, and ready-made product check. Therewith we provide high and stabile quality.

Having more then 10 years of production experience, as well as high production volume, we are offering competitive prices and stabile supply. Our assortment includes more then 30 different hulls, from which one can choose most acceptable model line for every region worldwide. High variety of accessories and equipment is available. Our core competence in development and production of boats now is becoming a background for creation of new distribution channels outside Russia.

NORDIK inflatable boats are made under control of the PETROSET RECREATIONAL PRODUCTS GROUP and these boats are an excellent choice for fishermen and hunters. They have original design, technically sophisticated construction and quality of execution in accordance with the international standard. Years of professional work created the most accessible high-quality boats: combination of uniqueness and versatility with NORDIK extremely low price.

NORDIK LIGHT

NORDIK LIGHT series boats are focuses on a wide range of buyers that purchase of motor-rowing boat for the first time, or have experience of operation with transom-less boat and plan to purchase the boat of more «advanced» design.

With good quality materials and the level of production, the price of the boat NORDIK LIGHT is comparable with the price of rowing transom-less boats of smaller size.

Accurate hull, high raised nose and large dead rise - all that creates the image of modern inflatable collapsible boat.

NORDIK STANDARD

The purposeful design of NORDIK STANDARD boats provides the ability to move quickly in the water and good handling.

STANDART series boats are represented by gray - olive protective color, and simple gray color.

Advantages of this series: the transom, on which you can install any engine of recommended horsepower, and presence of compact boats, capable for planning even with a less horsepower motor.

NORDIK STANDARD – is the standard of inflatable boats for fishermen and hunters.

NORDIK GIGANT

NORDIK GIGANT Series boats - are large inflatable boats with aluminum floors at the price of middle-sized boats with plywood floors.

The special features of these boats are: highly lifted the nose, the streamlined shape of the housing and large dead rise angle.

NORDIK GIGANT or NORDIK GT are the best choice for professional use.

Increased passenger capacity, and additional handles on the sides allows you to use a boat for the rescue operations, as well as the transportation of a large number of people.

High seaworthiness and a large number of the additional equipment make the boat universal and suitable for use in the most different areas, for example, for excursions in difficult accessible places and in scientific research, while patrolling in water reservoirs and for the needs of the ministry of emergency situations

However, these boats are not only for professionals, but also for fans of fishing, hunting and water recreational activity.

NORDIK HARDY

HARDY series boats, issued under the logo of NORDIK HD are the new exclusive branch NORDIK project.

It is a reliable boats with camouflage painting. All the materials and components of this series have increased durability.

12 mm plywood as hard flooring, combined with a full set of aluminum anodized profile to increase the rigidity of floorboard and 36 mm transom allow you to use the boat in the most severe conditions of operation, with maximum load and maximum power outboard.

Camouflage painting of series HD boats provides an excellent disguise, which fishermen and hunters will appreciate.
